English: B1 (Intermediate, CEFR)

Work setup: remote (preferred), hybrid, office; open to relocation and business trips

IT Recruiter · Technical Recruiter

Experience (1 year 6 months in hiring, three roles closed; 1 year 5 months of offline recruitment; 7 years 1 month total)

03.2025 — 09.2026 | **Recruitment and Project Management, BCH Labs, remote**

Trading bot on the Solana blockchain. Engineering roles in a narrow stack — Rust and blockchain. Team of up to 5: DevOps, ML engineer, Rust developers.

Key projects:

Full-cycle hiring: three roles closed (2025—2026)

Job descriptions, candidate profiles and interview stages were all mine.

- Closed three roles: lab business assistant, ML engineer (Trading), Rust Tech Lead — from profile definition to the person starting work
- Channels: tested the funnel via Threads, sourced in specialised Telegram communities, posted in topical groups
- Application forms: started with Google Forms, moved to Notion forms so documentation and the candidate base live in one place
- Introduced paid trial days as a separate stage: the candidate works 3 days on real tasks before the hiring decision

Business assistant — first role closed (2025)

The role had been outsourced to an agency: a paid search, a small candidate pool with no screening or comparison tables, and the hire fell short of the level in under a month.

- Built the form and launched the funnel: 23 candidates in one day, 7 shortlisted against criteria
- Ran two interviews a day and finished the stage in 4 days; 4 candidates advanced, 2 got paid trial days
- One withdrew after the first day — the format was not for her; the second joined full time

Result: role closed in about a week in-house: 23 applications → 7 interviews → 4 finalists → 2 trial days → 1 hire, after the agency search had cost money and delivered nothing

Rust Tech Lead and developers (2025—2026)

Two external agencies searched for a month and a half and found no suitable candidate. We built the process in-house.

- A 13-question application form deployed as code via Google Apps Script; three assessment stages: 40-minute live coding with timing, take-home task, system design
- A 100-point scorecard across six blocks with pass marks at 65 and 45 and a list of stop signals; ran about 35 first-stage interviews
- Ran screening and live coding myself, then handed technical assessment to a more senior developer — selection quality improved

Result: 107 applications → 35 live coding sessions (33%) → 9 to take-home (26%) → 3 to system design → 3 hires: a tech lead and two middle+ developers. Full cycle about a month versus a month and a half with no result from two agencies

ML Engineer, Trading (2026)

A high-bar role: models and strategies in production.

- Wrote the application form: 15 questions in the form and a full specification of 41 questions across 8 blocks; described the product and the scope of the role, not just requirements
- Sourced in Telegram communities and designed the interview stages for the role

11.2023 — 04.2025 | **Business Assistant to the Founder, ETICO.BY, premium renovation studio, Minsk**

Offline recruitment for a premium renovation studio, up to 5 sites at once.

- Hired workers and selected crews to match scope; verified candidates by the work actually delivered on site

09.2022 — 06.2023 · **Lecturer; Academic Process Specialist, Belarusian State University, Minsk** — *classes and academic process — constant work with people and student cohorts*

Other experience (details in the portfolio): 08.2023 — 04.2025 cartographer-editor at a cartographic enterprise (mandatory placement); 03.2024 — 08.2025 technical assistant for psychology groups; 07.2023 — 11.2023 content assistant in an info-business project; 09.2016 — 11.2019 assistant to the head of CT-EXPRESS online school.

Education

2017 — 2023 | **Belarusian State University, Minsk**

Faculty of Geography and Geoinformatics, Department of Geodesy and Aerospace Cartography

Cartography and geodesy, specialist degree; MSc in Geographical Sciences

Research on population density mapping of Belarus. Chair of the housing committee of the faculty trade union: paperwork, database, student accommodation.

July 2026 | **BELHARD Education Center** — «Data Analyst from Scratch»: SQL and window functions, statistics and A/B tests, Python, BI dashboards

Certificates

July 2026 | Certificate of completion, «Data Analyst from Scratch», BELHARD Education Center

Skills

Full-cycle recruiting: role profile, job description, application form, screening, interviews, take-home, offer, onboarding

Technical screening: reading Rust, SQL and Python code; assessing take-home tasks and GitHub profiles

Structured interviewing: timed scripts, scorecards, pass marks, stop signals

Funnel metrics: stage conversion, applications and interviews per hire, offer acceptance rate

Tools and channels: Google Apps Script, Notion, Google Workspace; Telegram, LinkedIn, GitHub

Domains: blockchain and Solana, ML and trading, data analytics, online education

Languages: Russian — native; English — B1 (Intermediate)
